

METALS & MINING

Review

Matrix Design Group

matrixteam.com

Matrix Design Group is headquartered in Indiana and has been working on delivering safety and productivity solutions for underground mining, surface mining, and industrial operations since 2006. Its portfolio comprises data networking, communication and tracking, mining proximity detection, and industrial collision avoidance systems, as well as data analytics software

MILLER CONTRACTING SERVICES

millercontracting.us

MILLER is a family-owned and run business that was established in 2001. They began by specializing in residential, light commercial, and agricultural concrete. Because of its position in the Illinois Coal Basin, they quickly could work on coal mining projects. Since then, they have concentrated solely on the industrial and mining industries

Ausenco

ausenco.com

Ausenco is a worldwide corporation that is reinventing what is possible. They give creative, value-add consulting studies, project delivery, asset maintenance and operation solutions to the mining & metals, oil & gas, and industrial sectors, combining solid technical experience with a 30-year track record

Austin Engineering

austineng.com

Austin provides specialized equipment to big worldwide mining companies, contractors, and original equipment manufacturers. Their unique solutions increase the client's productivity and revenues.
