

Integrated Network Solutions

HIGH-SPEED CONNECTIVITY FROM CONTROL CENTER TO THE LAST MILE

The Path to Automation

- Single network or hybrid solutions
- High-speed data connectivity
- Voice & tracking
- Air monitoring
- Cameras / video

The Plexus PowerNet™ networking system delivers high-speed digital communications via coaxial cable that provides PoE+ power to Wireless Access Points (WAPs), cameras and any other IP-based device.

NLT's N-Connex is a high-speed modular network designed to deliver gigabit data throughput speed to run all the data through it you want – including teleops, autonomous vehicles and video.

Icom makes a rugged line of IP Advanced radio systems, including VoIP radios and LTE transceivers for wide area or nationwide network coverage.
